	ne Specific Outcomes of B.Sc. (va) - Plant Biology and technology	
PSO No:	Programme Specific Outcomes Students of B.Sc. Plant Biology and Plant Biotechnology will be able to.	POs Addressed
PSO – 1	Interpret the morphology, anatomy, development, life cycle and classification of selected Algae, Fungi and Non-Vascular and Vascular Plants.	PO2
PSO – 2	Compare the ecological principles with various ecosystems and apply remote sensing in the conservation of natural resources.	PO2
PSO – 3	Assess the physiological responses of plants to environmental factors and evaluate the role of water, nutrients, and plant hormones in Plant Growth and Development.	PO2
PSO – 4	Determine the basic structure, property and functions of hereditary materials and to elucidate their role in molecular biology and biotechnology.	PO2
PSO – 5	Demonstrate mass production of clonal plants through tissue culture, apply biotechnological tools for the production of transgenic plants and use of computers in biology.	PO2,PO5

Se	mester	VI			
Year of In	nplementation	From the academ during particular	•	s required as some o	of the courses may not be revised
Course	e Objectives	To get acquainted	sport of water and inorgani with the role of Plant horn e reactions of metabolic pat	nones in growth and	development.
	CO # Course Outco				<b>Bloom's Taxonomy Levels</b>

# On completing the course successfully, the student will be able to

CO 1	find the main themes of Plant Physiology and Biochemistry. Determine the structure and functional relationships in water and nutrient uptake by plants.	PSO1&3	K1	
CO 2	demonstrate an understanding of plant hormones in regulation of growth and development. Understand the function of biomolecules.	PSO3	K2	
CO 3	identify the role of enzymes in biochemical reaction process.	PSO3	К3	
CO 4	analyse metabolic pathways and the regulation of biochemical process.	PSO3	K4	

	ATP and as	e biochemic similation				the form	nation c	of <b>PS</b>	03	ŀ	ζ5

Programı Biotechn	me Specific Outcomes of M.Sc. (va) - Plant Biology and Plant ology	
PSO No:	Programme Specific Outcomes Students of M.Sc. Plant Biology and Plant Biotechnology will be able to.	POs addressed
PSO – 1	Comprehend the morphology, anatomy, development, life cycle, classification and economic & ecological significance of different Algae, Fungi and Non - Flowering Plants.	PO1
PSO – 2	Describe, identify, name and classify flowering plants based on Morphology, Anatomy & Molecular Phylogeny and list the Ethno-botanical & Economic importance of different families.	PO1
PSO – 3	Discuss on various ecosystems and forest types and the role of GIS and remote sensing in management and conservation of natural resources.	PO1, PO6
PSO – 4	Evaluate the process of transport, growth and development in plants from biochemical, biotechnological and environmental perspectives.	PO1
PSO – 5	Perceive the structure, property and functions of nucleic acids and proteins and their applications in molecular biology, biotechnology and in silico studies.	PO1, PO2, PO5
PSO – 6	Formulate and carry out independent research projects acquiring laboratory and field expertise both in the classical and applied areas of Plant Sciences.	PO1, PO2, PO3, PO4, PO5

Paper 1a Core Theory: MYCOLOGY AND PLANT PATHOLOGY

### M.Sc. - PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

CO 5	explain the inbuilt mechanism of defense in plants and role of environment in disease development	PSO-1		К5	
	SYLLABUS				
UNIT	CONTENT	HOURS	COs	BLOOM'S TAXONOMY LEVEL	
I	A general account of fungi, their nature, distribution, structural variation, development, modes of reproduction, patterns of life cycle. A general knowledge of heterothallism and hormonal mechanism of sexual reproduction. A critical reference to the position of fungi in recent classification of the plant and other kingdoms. Classification of fungi as given by Alexopoulous and Higher level phylogenetic classification (Hibbett).	17	C01-5	K1-K5	
П	Occurrence, distribution, somatic structure, reproduction and life cycle of Myxomycota ( <i>Physarum</i> ), Plasmodiophoromycota ( <i>Plasmodiophora</i> ), Oomycota ( <i>Pythium</i> ), Chytridiomycota ( <i>Synchytrium</i> ), Zygomycota ( <i>Rhizopus</i> , <i>Pilobolus</i> ), Ascomycota ( <i>Peziza</i> ), Basidiomycota ( <i>Polyporus Puccinia</i> ) and Deuteromycota ( <i>Colletotrichum</i> ) Aspergillus.	15	C01-5	K1-K5	
III	Lichen: Diversity, types, classification & its use in environment. <i>Parmelia</i> & <i>Usnea</i> Mycorrhizae: Types, occurrence & its use in agriculture and bioremediation, <i>Pisolithus, Glomus</i> . Importance of fungi in academy and industries. Cultivation of Mushrooms.	13	CO1-5	K1-K5	
IV	A General account of plant diseases caused by mycoplasma, bacteria, viruses & fungi. Causes of plant diseases, Mechanism of infection; inoculum potential, penetration, infection, factors governing infection. Symptoms and identification of plant diseases. Host – parasite interaction: Effect of infection on the physiology of the host, role of toxins in pathogenesis. Effect of environment on pathogenesis.	17	C01-5	K1-K5	
V	Defense mechanism in plants. Principles of plant disease management. Control of plant diseases through cultural practices, biological control, genetic methods, fungicides including systemic fungicides and other protectants.	13	C01-5	K1-K5

# Paper 2a Core Theory: BRYOLOGY, PTERIDOLOGY AND GYMNOSPERMOLOGY

Course Code	212BO1M02		
Credits	4		
Hours / Cycle	75		
Category	Part	Core	Theory
Semester	1		
Year of Implementation	From the academic	e year 2021-2022 onwards	
Course Objectives	between various for	orms of cryptogams. Students learn	g of the structure and interrelationship within and the evolutionary trends in non vascular plants. The y, distinctive characteristics and significance of

CO #	Course Outcome(s)	PSO Addressed	Bloom's Taxonomy Levels (K1 to K5)
------	-------------------	------------------	---------------------------------------

On compl	leting the course successfully, the student will be able to			
CO 1	recall the characteristic features of Bryophytes, Pteridophytes and Gymnosperms.	PSO 1		K1
CO 2	classify the various lifeforms of Bryophytes, Pteridophytes and Gymnosperms.	PSO 1		K2
CO 3	identify the various classes of Bryophytes, Pteridophytes and Gymnosperms based on the morphological, anatomical and reproductive characters of extant and extinct forms.	PSO 1		К3
CO 4	analyse the evolutionary significance, distribution and threats of bryophytes, Pteridophytes and Gymnosperms.	PSO 1		K4
CO 5	assess the ecological significance of Bryophytes, Pteridophytes and Gymnosperms.	PSO 1		К5
	SYLLABUS	•		
UNIT	CONTENT	HOURS	COs	BLOOM'S TAXONOMY LEVEL
I	General account of habit, habitat, ecology and distribution of bryophytes. Characteristics of bryophytes as true plants. Classification of bryophytes - Goffinet and Shaw (2009). Distinguishing features of Marchantiophyta, Anthocerotophyta and Bryophyta. Adaptations for land habit. Fossil bryophytes. Phylogeny of bryophytes. Culture of bryophytes. Economic importance.		CO1-5	K1-K5
п	Range of vegetative and reproductive structures, modes of reproduction in liverworts (Haplomitriopsida – Calobryales; Marchantiopsida - Sphaerocarpales, Marchantiales; Jungermanniopsida – Fossombroniales, Porellales; Jungermanniales) hornworts (Anthocerotales, Notothyladales); and mosses (Takakiales, Sphagnales, Polytrichalesand Bryales).		CO1-5	K1-K5
ш	. Features of Seedless Vascular Plants : Organisation of sporophyte, stele, microphylls and megaphylls, homospory, heterospory, gametophytes and embryos. Classification of fossil and living pteridophytes – Smith et al., 2008; Origin and evolution of early vascular plants; Telome Theory. Significance of extinct Divisions: Rhyniophyta ( <i>Rhynia, Cooksonia</i> ); Zosterophyllophyta ( <i>Zosterophyllum</i> ); Trimerophyta ( <i>Trimerophyton</i> ). Selected fossil lycopods ( <i>Asteroxylon, Lepidodendron</i> ), equisetophytes ( <i>Sphenophyllum, Calamites</i> ) and ferns (Coenopteridales).		CO1-5	K1-K5
IV	Survey of structure and reproduction in living pteridophytes. Psilotophyta ( <i>Psilotum</i> ); Lycopodiophyta (Lycopodiales, Selaginellales, Isoetales); Equisetophyta ( <i>Equisetum</i> ); Pterophyta (Ophioglossales, Filicales, Marsileales).	15	CO1-5	K1-K5
V	Characteristics of gymnosperms. Classification of gymnosperms (Christenhusz's classification – 2011) and their interrelationships. Distribution of Gymnosperms. Groups of fossil gymnosperms: progymnosperms ( <i>Archaeopteris</i> ), pteridosperms ( <i>Lyginopteris</i> ), glossopterids ( <i>Glossopteris</i> ), cycadeoids ( <i>Williamsonia</i> ), Pentoxylon. Distribution, reproduction and interrelationships of Cycadophyta ( <i>Cycas</i> ), Coniferophyta ( <i>Pinus, Araucauria</i> and <i>Taxus</i> ), Ginkgophyta ( <i>Ginkgo</i> ) and Gnetophyta ( <i>Gnetum, Ephedra</i> and <i>Welwitchia</i> ). Economic importance of Gymnosperms. Indian contributions to Gymnosperms		C01-5	K1-K5

UNIT	CONTENT		HOUR	S	COs	BLOOM'S TAXONOMY LEVEL

Ι	Structure of various thallus and reproductive stages of fungi belonging	33		K1-K5
	to various classes. Laboratory techniques in mycology: Preparation of culture media. Preparation of culture slants and plates. Plate assay techniques. Isolation of soil fungi, aquatic fungi and coprophilous fungi. Growth of fungi using baits-Moisture chamber. Sporangial and spore discharge mechanism of fungi with particular reference to <i>Pilobolus</i> . Sectioning and observation of Zygomycotina ( <i>Mucor &amp;Rhizopus</i> ), Ascomycotina ( <i>Galiella, Xylaria</i> ), Basidiomycotina ( <i>Ganoderma, Lentinus</i> ), Deuteromycotina ( <i>Alternaria</i> ). Sectioning of Lichen Thallus & Reproductive structure: Parmelia &Usnea		C01-5	
	<ul> <li>Study of structures associated with the following diseases: Fungal Disease (Sectioning and Observation): Damping off of mustard (<i>Pythium</i>), White rust of Cruciferae (<i>Albugo</i>), Club root of Cruciferae (<i>Plasmodiophora</i>), Brown rust of wheat (<i>Puccinia</i>), Red rot of sugarcane (<i>Colletotrichum</i>), Leaf spot of brinjal (<i>Alternaria</i>), Tikka disease of groundnut (<i>Cercospora</i>).</li> <li>Bacterial Disease (Observation):Blight of rice(<i>Xanthomonas oryzae</i>), Citrus canker (<i>Xanthomonas citrii</i>)</li> <li>Viral Disease (Observation): Vein clearing of <i>Acalypha</i>, Mosaic of <i>Phaseolus</i></li> <li>Mycoplasma Disease (Observation): Little leaf of brinjal, Leaf curl disease</li> </ul>			
П	Study of habit, habitat distribution, external and internal structure of gametophytes of selected species; Sporophytes and reproductive structures of the following: <i>Riccia, Reboulia, Dumortiera, Marchantia, Blyttia (Pallavicinia), Anthoceros, Sphagnum,</i> and <i>Polytrichum.</i>	33	C01-5	K1-K5
	Knowledge of some common bryophytes of Tambaram and neighbourhood.			
III	Study of vegetative and reproductive structures of the following living members: <i>Psilotum, Lycopodium, Selaginella, Isoetes, Equisetum, Ophioglossum, Gleichenia, Marsilea,</i>	33	CO1-5	K1-K5
	Slides or photographs of fossil Pteridophytes - <i>Rhynia, Zosterophyllum, Lepidodendron, Calamites</i>			
IV	Study of vegetative and reproductive structures of the following living gymnosperms: Cycas, Ginkgo, Pinus, Araucaria and Gnetum.         Study and identification of fossil slides or photographs of Lyginopteris,         Market Hammer and Design and Comparison of Lyginopteris,	33	CO1-5	K1-K5
V	Medullosa, Williamsonia and Pentaxylon.         Selected techniques in light microscopy         Permanent slide preparation –Microtomy, pollen acetolysis method and         micrometry         Photomicrography and Photomacrography         Photomicrographs of LM and EM         Demonstration of tissue printing technique         Demonstration of the following instruments:         p <sup>H</sup> meter, spectrophotometer, centrifuge,         chromatography and electrophoresis. Observation of Analytical         instrument form unrivue	33	C01-5	K1-K5
	instruments from various laboratories of institutions in and around Chennai. Demonstration of SDS-PAGE, Column chromatography

CO #		Course Outcome(s)	PS( Addre		Bloom's Taxonomy Levels (K1 to K5)			
On compl	leting the course	successfully, the student will be able to						
CO 1	recall the struc and remote sen	ture and function of ecosystems, biogeography sing.	PSO3			K1		
CO 2	understand with	n major forest types and their conservation.	PSO3			K2		
CO 3	develop awarer	ness of population ecology and remote sensing.	PSO3		K3			
CO 4	examine the impact of global climatic change and its multiple <b>PSO3 K4</b> threats.							
CO 5	assass the curr	ent advances in remote sensing technology and	PSO3			K5		
005		to manage natural resources.	1505			K5		
	TI	SYLLABUS	1					
UNIT		CONTENT		HOURS	COs	BLOOM'S TAXONOMY LEVEL		
I	Terrestrial (for and Niche: C fundamental a partitioning; c Biomes; theory	Ecosystem ecology: Structure and function of some Indian ecosystems: Terrestrial (forest, grassland) and Aquatic (fresh water, marine). Habitat and Niche: Concept of habitat and niche; niche width and overlap; fundamental and realized niche, Ecological niche modelling; resource partitioning; character displacement. Biogeography: Major Terrestrial Biomes; theory of Island Biogeography; Biogeographical zones of India. Holdridge Life Zone Classification.						
П	Community ecology: Nature of Communities; Community structure and attributes; levels of Species Diversity and its measurement; Edges and Ecotones. Forest community as an Interacting system. Synusiae in a forest community and their relationship with the forest environment. Microclimate and Macroclimate. Ecological succession: Hydrosere and Xerosere, mechanisms, changes involved in Succession; Seral stages; Autogenic and Allogenic succession, Concept of Climax.15CO1-5K1-K5							
Ш	curves; Popul populations. C Metapopulatio structured pop and Survivors species intera Herbivory, Ca	Population Ecology: Characteristics of a population; Population growth curves; Population regulation; r-selection and k-selection in species populations. Concept of Metapopulation – Demes and Dispersal, Interdemic Extinctions, Age structured populations. Sympatry and Allopatry speciation. Demography and Survivorship curves. Competition exclusion principle. Types of species interactions: Interspecific and Intraspecific Competition, Herbivory, Carnivory, Predation, Parasitism, Pollination, Symbiosis, Commensalism, Mutualism.15CO1-5K1-K5

PAPER 11a ECCOMBINED PRACTICAL ON ANGIOSPERMS SYSTEMATICS; PLANT PHYSIOLOGY, BIOCHEMISTRY & ECOLOGY, FORESTRY AND REMOTE SENSING

Course Code	212BO3N	404		
Credits	4			
Hours / Cycle	75			
Category	Part	Major	Theory	
Semester	III		·	
Year of Implementation	2021-202	2 onwards		

Cour	se Objectives	specimen based on the fresh collections, and rules. To familiarize students with the Laboratory ex effective learning.	To familiarize students with the Laboratory experiments related to Plant Physiology and Biochemistry f							
CO#		Course Outcome(s)	PSO Addressed	Bloom's Taxonomy Levels (K1 to K5)						

# On completing the course successfully, the student will be able to

CO 1	define basic nomenclatural problems and construct <b>PSO2</b> unambiguous taxonomic key and Preparation and maintenance of herbarium specimens.			K1
CO 2	explain flowering plants based on taxonomic technical Terms. <b>PSO2</b>			K2
CO 3	identify the importance of water, minerals and food transport in <b>PSO4</b> plants and Evaluate the biomolecules present in plants.			К3
CO 4	analyse water and soil for pH, acidity, alkalinity, chlorinity, <b>PSO4</b> free carbon dioxide, dissolved oxygen and organic matter.			K4
CO 5	assess the vegetation Simpson's and Shannon-Wiener indices PSO6 and Quantitative sampling of biodiversity. SYLLABUS			K5

Preparation of different solutions: Molar, Molal and Normality solutions, pH and Buffers.     -5       8.     Determination of water potential using Chardakov's, and plasmolytic methods.     -5       9.     Effect of temperature and organic solvents on permeability of beet root cells.     10.       10.     Separation of known and unknown amino acids by paper chromatography.     11.       11.     Separation of chlorophast pigments by paper / column chromatography and quantification of chlorophyll a, b and carotenoids.     14.       12.     Estimation of free amino acids by Ninhydrin method.     14.       13.     Estimation of free amino acids by Ninhydrin method.     14.       16.     Effect of light and wind on rate of transpiration.     17.       17.     Localization of potssium ions in the guard cells of stomata during stomatal opening and closure.     18.       18.     Structure, function and relationship in C3 and C4 photosynthetic sub types. (C3-Bambusa, Orya; C4 Subtypes. NADP-ME - Aristida, Digitaria, Cenchrus;     NAD-ME - Cynodon, Eleusine; PEP-CK - Chloris, Engrostis).       19.     Comparative rate of respiration in the plant samples by titration method.     20.       21. Demonstration of disolved oxygen in the water samples.     -5       25.     Determination of free CO2 in water samples.     -5       26.     Estimation of alkalinity in water samples.     -5       27.     Estimation of disolved oxygen in the water samples. <td>7.     Preparation of different solutions: Molar, Molal and Normality solutions, PH and Buffers.     -5       8.     Determination of water potential using Chardakov's, and planolytic methods.     -5       9.     Effect of temperature and organic solvents on permeability of beet pot cells.     10.       10.     Separation of known and unknown amino acids by paper formatography and quantification of chlorophyta triggements by paper / column chromatography and quantification of chlorophyta to a bar carobendis.     12.       11.     Separation of tree amino acids by Ninhytrin method.     14.       12.     Estimation of tree amino acids by Ninhytrin method.     14.       13.     Estimation of otal carbohytratus (Anthrone reagent method / Phenol Sulphure; Varieth and vind or rate of transpiration.     14.       16.     Effect of light and wind or rate of transpiration.     14.       17.     Localization of potassium ions in the guard cells of stomata during stomatal opening and closure.     Aristida.       18.     Structure, function and relationship in C3 and C4 photosynthetic sub types.     CO1 Phenol Sulphure.       19.     Comparative rate of respiration in the plant samples by titration method.     20.       21.     Demonstration of Gravitropic response in grass pulvinus.     21.       22.     Determination of Grave oregare maphes.     45     CO1       23.     Qualitative study of plant as maphes.     5     5       24.</td>	7.     Preparation of different solutions: Molar, Molal and Normality solutions, PH and Buffers.     -5       8.     Determination of water potential using Chardakov's, and planolytic methods.     -5       9.     Effect of temperature and organic solvents on permeability of beet pot cells.     10.       10.     Separation of known and unknown amino acids by paper formatography and quantification of chlorophyta triggements by paper / column chromatography and quantification of chlorophyta to a bar carobendis.     12.       11.     Separation of tree amino acids by Ninhytrin method.     14.       12.     Estimation of tree amino acids by Ninhytrin method.     14.       13.     Estimation of otal carbohytratus (Anthrone reagent method / Phenol Sulphure; Varieth and vind or rate of transpiration.     14.       16.     Effect of light and wind or rate of transpiration.     14.       17.     Localization of potassium ions in the guard cells of stomata during stomatal opening and closure.     Aristida.       18.     Structure, function and relationship in C3 and C4 photosynthetic sub types.     CO1 Phenol Sulphure.       19.     Comparative rate of respiration in the plant samples by titration method.     20.       21.     Demonstration of Gravitropic response in grass pulvinus.     21.       22.     Determination of Grave oregare maphes.     45     CO1       23.     Qualitative study of plant as maphes.     5     5       24.

	SYLLABUS						
UNIT	CONTENT	HOURS	COs	BLOOM'S TAXONOMY LEVEL			
I	Introduction to Biotechnology: Branches-Red, Blue, White and Green Biotechnology, history and scope. Genetic transformation and production of Transgenic Plants: Direct and Indirect (Physical, Chemical and Biological) methods with special emphasis on Chloroplast and Protoplast Transformation. Confirmation of Stable Integration of DNA-Genomic, Transcript and Translational level.	15	C01-5	K1-K5			
Π	Tools and Techniques in Biotechnology- Isolation of Genomic DNA and Plasmid, Restriction Enzymes, Ligases, other DNA Modifying Enzymes- (Polynucleotide Kinase, Phosphatase, DNases, Polymerases), Vectors (Viral Vectors and Agrobacterial Vectors). Plant Genome Organization: Nuclear, Chloroplast and Mitochondrial Genome and its Importance in Genetic Engineering, Isolation and Characterization of DNA and RNA DNA libraries, DNA Sequencing (Maxam & Gilbert method, Sanger's Chain Termination Method and Pyrosequencing), DNA Fingerprinting and DNA Foot Printing, Transcript Analysis, SSH and RACE.	15	C01-5	K1-K5			
Ш	Biotechnology in Crop Improvement: Methodologies adopted in the followingtransgenic plants, increased shelf life of fruits (Flavr Savr Tomatoes), increased biomass production (nif gene transfer), nutritional enhancements (Vitamins,proteins), plants with herbicide resistance (round up crops), pest resistance (Bt andother gene candidates), stress tolerance (salt and drought), and horticultural quality (Designer flowers), Molecular farming for therapeutic protein (Edible Vaccines, Plantibodies, Plantigens), Protection of Intellectual Property (Seed Terminator Technology) - Safety & Ethical issues related to Transgenic Plants.	15	C01-5	K1-K5			
IV	Plant Tissue Culture, Methods and Techniques: Concept of totipotency. Media for in- vitro Culture - Plant Growth Regulators. Design of plant tissue culture laboratory (R&D and commercial). Sterilization Procedures: Mechanical, Physical and Chemical methods. Steps involved in the	15	CO1-5	K1-K5			

#### SYLLABUS

	production and maintenance of Axenic cultures. Morphogenesis, Caulogenesis, Callusogenesis, Somatic Embryogenesis- Direct and			
	Indirect methods. Importance and steps involved in Shoot, Callus, Anther			
	/ Ovule, Embryo, Root, Cell Suspension and Protoplast Culture.			
V	Applications of Plant Tissue Culture in Crop Improvement:	15	CO1-5	K1-K5
v	Micropropagation, Synthetic Seed production, In vitro flowering and	15	01-5	N1-N3
	fertilization, In vitro Grafting, Embryo Rescue, Somatic Cell			
	Hybridization and Cybrids, Hairy-Root Culture, Cell Aggregate Cloning,			
	Secondary Metabolite Production, Cryopreservation and Conservation of			
	Plants, Mericloning for Virus-Free Plants, Somaclonal Variant selection.

#### Paper 14a PLANT ANATOMY, EMBRYOLOGY AND PALYNOLOGY

Course Code	212BO4M02		
Credits	4		
Hours / Cycle	75		
Category	Part	Core	Theory
Semester	IV		
Year of Implementation	From the academ	ic year 2021-22 onwards	

Course	Objectives
--------	------------

Г

The students will acquire knowledge and skills in the field of plant anatomy especially on commercial timber. Students will gain deep knowledge about the development and structures of reproductive organs; basic and applied aspects of Palynology.

DI

m

CO#	Course Outcome(s)		PSO dressed		Faxonomy Levels K1 to K5)
On comple	eting the course successfully, the student will be able to				
CO 1	recall the cellular components and ultra-structural details of various plant tissues and cell wall characters.	PSO2		K1	
CO 2	explain the secondary plant structure of stem and root; the various characteristic features of leaves, their development and significance.	PSO2		K2	
CO 3	identify the anatomical abnormality occurs in certain plant species, various economically important timbers and their compositions and determine the age of trees through the dendrochronology method.	PSO2		К3	
CO 4	compare the plant anatomical structure with its function and reproduction.	PSO2		K4	
CO 5	Interpret the structure of meristematic permanent tissues, pollen grains and its importance in various applied fields.	PSO2		K5	
	SYLLABUS				
UNIT	CONTENT		HOURS	COs	BLOOM'S TAXONOMY LEVEL
Ι	Cell Wall: Cell wall components, Microscopic structures, Pits a ultrastructure. Meristems: Meristems - Apical, Lateral, Interc Axillary, Basal. Shoot Apex: Organisation of Shoot Apex. apex: Organisation of Root Apex. Vascular cambium: Vas Cambium and Cork Cambium.	alary, Root	15	C01-5	K1-K5
Ш	Xylem: Primary and Secondary xylem; Cell types: Trac. Vessels, Fibers and Parenchyma. Phloem: Primary and Seco Phloem; Cell types: Sieve cell, Sieve tube element, Companion Phloem fibers, Phloem; Parenchyma; Ontogeny of sieve ele Internal and External phloem. Leaf: Development & Structure on Symmetry, Environment & Photosynthetic Types; Sto Senescence and Abscission. Secretory Structures: External Sec: Structures (Glandular trichomes, Salt glands, Stinging hair: Nectaries); Internal Secretory Structure (Internal Secretory Secretory Cavities and Ducts, Laticifers).	ndary n cell, ment; based mata, retory s and	15	C01-5	K1-K5
Ш	Anomalous Secondary Growth: Stem- Dicots ( <i>Bignonia</i> <i>Pachygone</i> ) and Monocots ( <i>Dracaena</i> ). Root: Dicots ( <i>Tinospor</i> <i>Achyranthes</i> ). Wood: External features- Colour, hardness, luster, texture. Internal Features-Porous wood, non-porous Ultrastructure and Diagnostic Features [Heart wood and Sap wo Types and Uses of Wood; Commercial wood (Teak, Padol Kongu). Dendrochronology - Concept and Application Dendrochronology (Sampling, Dating). Applied Ana Application of plant Anatomy in Taxonomy, Food Adulterant Forensic science.	a and odor, wood, od]. c and s of tomy:	15	C01-5	K1-K5
IV	Pollination: Significance of Pollination; Contrivances for Pollination; Pollination syndromes; Primary and Seco Attractants. Self-Incompatibility: Gametophytic and Sporoj Self-incompatibility; Style and Stigma - Types and Fun Microsporangium (Anther): Ontogeny and Ultrastructure; Tape Structure and Function; Male Gametophyte: Structure, Develop and Function. #### Paper 4b. PLANT TAXONOMY

Course Code	212BO4E09		
Credits	5		
Hours / Cycle	60		
Category	Part	Elective	Theory
Semester	IV		
Year of Implementation	2021-2022 onwar	ds	
Course Objectives		racter states, referenci	cations, methods in phytography, evaluation of different types of ing different taxonomic literature and knowledge on earlier floristic

CO #	Course Outcome(s)	PSO Addressed	Bloom'	s Taxonomy Levels (K1 to K5)	
On compl	eting the course successfully, the student will be able to				
CO 1	Recall pre- & post-Darwin's classifications and classify flowering plants.	PSO 2		K1	
CO 2	explain description and botanical illustrations.	PSO 2		K2	
CO 3	Apply various taxonomic literature (flora, revision, and monograph) for the identification of local plants	PSO 2		К3	
CO 4	Analyse different types of taxonomic characters (analytic vs synthetic; qualitative vs quantitative; primitive vs advanced, homologous vs analogous).	PSO 2	К4		
CO 5	Discuss on different floristic regions of the world and floristic studies in Tamil Nadu.	PSO 2	K5		
	SYLLABUS				
UNIT	CONTENT	HOURS	COs	BLOOM'S TAXONOMY LEVEL	
I	Classification systems prior to Darwin: Systems based on Habit, Sex systems, Systems based on Form Relationships. Post-Darwinian Systems: Systems based on Ranalien School, Systems based on Englearean School.	rual 15	CO1-5	K1-K5	
П	Phytography - Methods and Styles of writing Descriptions. Botani Illustrations, their importance and important illustrated floras. Pla photography and pictorial floras.		C01-5	K1-K5	
Ш	Taxonomic literature: Print (Journals, Floras, Revisions, Monograp Dictionaries, Indices) and online sources as given under reference.	ohs, 15	CO1-5	K1-K5	

IV	Characters and character states: Introduction to different types of characters with five examples for each - analytic versus synthetic; qualitative versus quantitative; primitive versus advanced, and homologous versus analogous.	CO1-5	K1-K5
V	Floristic regions of the world and Phytogeographical regions in India. Vegetation types of India. Major milestones in Floristic studies in India with special reference to Tamil Nadu.	CO1-5	K1-K5

Overall Mapping of the Course												3			

# Credit Based semester system for UG Programme (Science) B.Sc. va Plant Biology and Plant Biotechnology

## QUESTION PAPER PATTERN FOR B.Sc. va

Part A

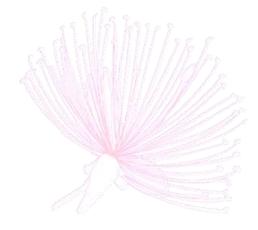

Answer all Ten questions, answer not to exceed half-a-page each. All questions compulsory. Each carries two marks. 10x2=20 marks

### Part B

Answer any Five questions out of eight, answer not to exceed two pages each. Each carries eight marks. Draw diagram wherever necessary 5x8=40 marks

## Part C

Answer any two questions, out of three, answer not to exceed five pages each. Each carries twenty marks. Draw diagram wherever necessary 2x20=40 marks

#### MADRAS CHRISTIAN COLLEGE (AUTONOMOUS)

# Credit Based semester system for UG Programme (Science) M.Sc. va Plant Biology and Plant Biotechnology

## QUESTION PAPER PATTERN FOR M.Sc. va

## Part A

Answer all Ten questions, answer not to exceed half-a-page each. All questions compulsory. Each carries two marks. 10x2=20 marks

#### Part B

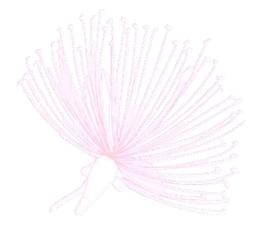

Answer any Four questions out of six, answer not to exceed three pages each. Each carries ten

marks. Draw diagram wherever necessary

4x10=40 marks

## Part C

Answer two questions either or pattern, answer not to exceed five pages each. Each carries twenty marks. Draw diagram wherever necessary 2x20=40 marks
