DEPARTMENT OF COMPUTER SCIENCE

CHOICE BASED CREDIT SYSTEM (CBCS) Learning Outcome-based Curriculum Framework (LOCF) SYLLABUS

2025 - 2026

MADRAS CHRISTIAN COLLEGE (AUTONOMOUS) College with Potential for Excellence

Affiliated to University of Madras

Tambaram

Chennai – 600 059

MADRAS CHRISTIAN COLLEGE

VISION

Madras Christian College aspires to be an Institution of excellence transforming lives through education with a commitment to service.

MISSION

Madras Christian College (MCC) with the inspiration of the love of God offers to people of all communities education of the whole person, which is congruous with God's revelation in Christ of the true nature of humanity and is appropriate to the needs of India and of the world. The department of Computer Science strives to provide sound learning in the field of Technical Education, train a sizable group of students to become valuable resources in the IT Industry and develop wholesome personalities, equipped with Christian values

Graduate Attributes

The Madras Christian College defines the philosophy underpinning its academic programmes and student life experience on campus through the Graduate Attributes (GA), that describe the knowledge, competencies, values and skills students imbibe for holistic development and contribution to society. These attributes encompass characteristics that are transferable beyond the domain of study into the national and international realm fostered through curricular, cocurricular and extra-curricular engagements.

GA 1: Intellectual Competencies

- Graduates of MCC have a comprehensive and incisive understanding of their domain of study as well as the capability for cross-disciplinary learning.
- They have the ability to apply the knowledge acquired through the curriculum as well as self-directed learning to a broad spectrum ranging from analytical thinking to synthesise new knowledge through research.
- Forming independent individual opinions regarding academic cores and socially relevant issues

GA 2: Professional Ethics

- Graduates of MCC develop ethical and professional behaviour, which will be demonstrated in their chosen careers and constructive citizenship roles.
- They imbibe intellectual integrity and ethics in scholarly engagement and develop a spirit of inclusiveness through interactions with people of special needs and diversity.

GA3: Leadership Qualities

- Graduates of MCC inculcate leadership qualities & attitudes, and team behaviour along democratic lines through curricular, co-curricular and extra-curricular activities
- They develop managerial and entrepreneurial skills to ideate and create new opportunities along with career readiness and capacity to take up various competitive exams.

GA 4: Holistic Skill Development

- Graduates of MCC develop critical thinking, problem-solving, effective communication, emotional and social skills
- They develop digital competency to live, learn and serve in society.

GA 5: Cross-Cultural Competencies

- Graduates of MCC imbibe cross-cultural competencies through engaging with diverse linguistic, ethnic and religious communities providing scope to understand, accept and appreciate individuals at local, national and international levels.
- They develop a global perspective through contemporary curriculum, culture, language and international exchange programmes

GA 6: Service-Oriented Focus

- Graduates of MCC have sensitivity to social concerns and a conviction toward social justice through a commitment to active social engagement.
- They are endowed with a strong sense of environmental awareness through the curriculum and campus eco-system.

GA 7: Value-Based Spiritual Development

- Graduates of MCC are rooted in the principles of ethical responsibility and integrity permeated with Christian values leading to the building of character.
- They develop virtues such as love, courage, unity, brotherhood, industry and uprightness.

Programme Outcomes

Programme Outcomes (POs) of Madras Christian College define the minimum level that students are expected to do, achieve and/or accomplish in order to graduate from a particular programme. These Outcomes are a framework to assess the nature of learning activity experienced within the programme.

| MADRAS CHRISTIAN COLLEGE | | | | | | | | |
|---------------------------------|--|--|-----------------------------|--------------|--|--|--|--|
| POs FOR POSTGRADUATE PROGRAMMES | | | | | | | | |
| Upon | Upon completion of a Postgraduate programme, the student will be able to | | | | | | | |
| PO1 | Domain Knowledge | Develop intensive and extensive knowledge and expertise in their respective domains Evaluate and create/construct domain specific knowledge in areas of learning, research and industry Formulate and extrapolate the knowledge gained to apply in real – life situations and competitive examinations Develop an aptitude for self-directed learning for excellence in their chosen area within the domain | GA1, GA3, GA4 | Rigo rous | | | | |
| PO2 | Applicative knowledge and Lateral Thinking | of study Translate theoretical understanding to experimental knowledge and solve complex problems using Systems/Design Thinking Apply advanced knowledge and approaches to solve concrete and abstract problems in domain-related and multi-disciplinary issues. Able to solve problems using unconventional and creative approaches | GA1, GA3, GA4 | | | | | |
| PO3 | Innovation and Research | Develop aptitude for innovation and entrepreneurship Identify contemporary research problems, analyze data and propose solutions | GA1, GA4, GA5, GA6 | | | | | |
| PO4 | Scientific Communication skills | Document, prepare and present scientific work as reports and research articles in academic forums Critically assess, review and present theories, principles and concepts | GA1, GA4, GA5, GA6 | | | | | |
| PO5 | Digital skills | Use of domain-related advanced software resources, computational skills and digital tools for data analysis, visualization and interpretation Ethically apply digital skills to creatively communicate a wide range of ideas and issues related to academic experiences | GA1, GA2, GA3, GA4 | | | | | |
| PO6 | Ethical practices | • Apply domain specific ethical principles and practices in academic, professional and social engagements | GA2, GA6, GA7 | | | | | |
| PO7 | Career readiness and higher education | Choose from diverse career options available in local, national and international realms. Carry out further research or pursue higher education in the country or abroad | GA1, GA2, GA5 | | | | | |

PROGRAMME SPECIFIC OUTCOMES (PSO)

At the time of graduation the graduates would be able to

| PSO # | Statement | Mapped with PO # |
|-------|--|--------------------------------------|
| PSO1 | Understand and apply the foundational concepts, techniques and Software Development principles to provide innovative solutions for challenging problems. | PO1, PO2, PO5, PO7 |
| PSO2 | Create solutions to real life problems with adequate applicative knowledge of technologies, emerging software trends and tools gained through theory and practice. | PO1, PO2, PO5, PO7 |
| PSO3 | Adapt to fast-changing advancements in Software development methods and practices through lifelong learning for a successful career or pursue higher studies / research. | PO1, PO2, PO3, PO5, PO7 |
| PSO4 | Apply professional and ethical principles, effective communication skills, multidisciplinary approach, skills to improve existing software systems and abilities to relate computing issues to the social context. | PO1, PO2, PO3, PO4, PO5, PO6, PO7 |

| Curriculum Overview Table | | | | | | | |
|---------------------------|----------------------------|--------------------------------------|--|--|--|--|--|
| Part | Credits | Hours per cycle | | | | | |
| I - Core Theory | 34 [(6*3)+(4*4)] | 38 [(8*4)+(2*3)] | | | | | |
| I - Elective | 20 (5*4) | 15 (5*3) | | | | | |
| I - Core Practical | 18 (9*2) | 33 [(6x4)+(3x3)] | | | | | |
| I - Project | 18 | 30 | | | | | |
| II - Soft Skill | 8 | 4 | | | | | |
| II - Internship | 2 | 3-4 weeks during vacation | | | | | |
| Total | 100 | 120 4 semesters * 30 hours | | | | | |

SYLLABUS

| Unit | Content | Hours | COs | Bloom's |
|------|--|-------|-------------------------------------|--------------------------|
| | | | | Taxonomy |
| Ι | OOP Paradigm: Key concepts of Object-Oriented | 12 | CO1. | Level K1. K2. |
| 1 | Programming - Abstraction, encapsulation, information hiding, class, object, inheritance, polymorphism, interface and implementation. Java Basics: Features of Java, Byte Code, JVM, JRE and JDK, Data types, Operators, Control Statements. Classes and Objects: Class, object, object reference, constructor, constructor overloading, method overloading, static members, access control modifiers. | 12 | CO2, CO3, CO4, CO5 | K1, K2, K3, K4, K5 |
| Π | Inheritance: Inheriting data members and methods, constructor in inheritance, method overriding, multilevel inheritance, and multilevel constructors. Stop inheritance of method, stop inheritance of class - final keywords. Interface: creation and implementation of an interface, interface reference, instanceof operator, interface inheritance, dynamic method dispatch, interface and abstract class. Wrapper Class. Nested class, inner class, anonymous inner class, abstract class. | 12 | CO1, CO2, CO3, CO4, CO5 | K1, K2, K3, K4, K5 |
| Ш | Array and Strings: Single and Multidimensional Array, String class, StringBuffer class, Operations on string, Command line argument. Package: use of package, classpath, import statement, static import, access control. I/O programming: Introduction to Stream, Byte Stream, Character stream, Readers and Writers, File Class, File InputStream, File Output Stream, InputStreamReader, OutputStreamWriter, FileReader, FileWriter, Buffered Reader. | 12 | CO1, CO2, CO3, CO4, CO5 | K1, K2, K3, K4, K5 |
| IV | Exception Handling: Exception and Error, Use of try, catch, throw, throws and finally, Built in Exception, Custom exception, Throwable Class. Multithreaded Programming: Use of Multithread programming, Thread creation, Thread class and Runnable interface, thread priority, thread synchronization, thread communication, deadlock. | 12 | CO1, CO2, CO3, CO4, CO5 | K1, K2, K3, K4, K5 |
| V | Generic Programming: Parameterized relations, generic methods, generic classes. Collection Classes: List, AbstractList, ArrayList, LinkedList, Enumeration, Vector, Properties, introduction to Java.util package. GUI Programming – Graphics class, Swing components, forms using Swing, Layout Managers. | 12 | CO1, CO2, CO3, CO4, CO5 | K1, K2, K3, K4, K5 |

| Year of Implementation | From the Academic year 2025-26 batch onwards | | | | | | | | | | |
|---------------------------|---|------------------------------|---|--|--|--|--|--|--|--|--|
| Course Objectives | To understand the working principles and query processing of databases. To understand the basics of SQL databases and their applications. To distinguish the different types of NoSQL databases. To understand the basics of XML and create well-formed and valid XML documents. | | | | | | | | | | |
| On completing th | On completing the course successfully, the student will be able to | | | | | | | | | | |
| CO# | Course Outcome(s) | PSO Addressed | Bloom's Taxonomy Levels (K1 to K5) | | | | | | | | |
| CO1 | Remember the basic concepts various Databases and the Database Design Principles. | PSO1, PSO2, PSO3, PSO4 | K1 | | | | | | | | |
| CO2 | Understand about the ER Diagram, Database design, SQL Queries and Protocols. Compare and Illustrate various Storage Media. | PSO1, PSO2, PSO3, PSO4 | К2 | | | | | | | | |
| CO3 | Build ER Diagram, Apply Integrity constraints, and Construct complex SQL Queries. | PSO1, PSO2, PSO3, PSO4 | К3 | | | | | | | | |
| CO4 | Understand a simple Transaction of a database application and underlying principles. | PSO1, PSO2, PSO3, PSO4 | K4 | | | | | | | | |
| CO5 | Acquire the knowledge about different special purpose databases and to critique how they differ from traditional database systems. | PSO1, PSO2, PSO3, PSO4 | К5 | | | | | | | | |

COURSE TITLE: DEEP LEARNING

| Course Code | | | | |
|---------------|--------|------|--------|--|
| Credits | 4 | | | |
| Hours / Cycle | 3 | | | |
| Category | Part I | Core | Theory | |
| Semester | III | | | |

| Year of Implementatio n | From the academic year 2025-2026 batch onwards | | | | | | |
|-------------------------------|---|---------------------------|---|--|--|--|--|
| Course Objectives | To understand the basics of deep learning fundamentals from scratch To learn the deep learning networks such as CNN and RNN To understand deep reinforcement learning and create models To be capable of developing applications with TensorFlow for real-world data | | | | | | |
| On completing th | ne course successfully, the student will be | e able to | | | | | |
| CO# | Course Outcome(s) | PSO Addressed | Bloom's Taxonomy Levels (K1 to K5) | | | | |
| CO 1 | Remember the fundamental concepts of Deep Learning and learning networks | PSO1, PSO2, PSO3, PSO4 | K1 | | | | |
| CO 2 | Understand the basic concepts of CNN, RNN, Reinforcement Learning and libraries used for Deep Learning in Python | PSO1, PSO2, PSO3, PSO4 | K2 | | | | |
| CO 3 | Apply CNN to create models for object detection, RNN for text analysis and auto encoder/decoder for Deep RL models | PSO1, PSO2, PSO3, PSO4 | К3 | | | | |
| CO 4 | Analyse the various learning networks for the real-time problems and choose the best one | PSO1, PSO2, PSO3, PSO4 | K4 | | | | |
| CO 5 | Develop research-based applications using deep learning techniques and TensorFlow | PSO1, PSO2, PSO3, PSO4 | K5 | | | | |

COURSE TITLE: VIRTUAL AND AUGMENTED REALITY LABORATORY

| Course Code | | | | | | | |
|---|---|--|---|---------------------------|---|--|--|
| Credits | 2 | | | | | | |
| Hours / Cycle | 3 | | | | | | |
| Category | Part I | Core | Practical | | | | |
| Semester | III | | | | | | |
| Year of Implementation | From the A | Academic year 2025-20 | 5 batch onw | vards | | | |
| Course Objectives On completing the | To To virt To To cha | To understand the concepts of Virtual and Augmented Reality To have a hands-on experience in transformations of objects in the virtual world, visual perception and rendering and motion tracking To set up a virtual environment using Unity To create interactive VR and AR applications with dynamically changing scenes | | | | | |
| CO# | Course Outcome(s) | | | PSO Addressed | Bloom's Taxonomy Levels (K1 to K5) | | |
| CO1 | Remember system and | the basic concepts creating an AR exper | of a VR ience | PSO1, PSO2, PSO3, PSO4 | K1 | | |
| CO2 | Understand transforma world, visu motion trad | the concepts in VF tions of objects in the al perception and rend cking and AR conception | R such as he virtual lering and ts such as | PSO1, PSO2, PSO3, PSO4 | K2 | | |

| | marker-based approach in AR and AR components | | |
|-----|---|---------------------------|----|
| CO3 | Apply all the VR concepts in a virtual environment set up by Unity and AR concepts in creating an AR experience | PSO1, PSO2, PSO3, PSO4 | К3 |
| CO4 | Analyse the scenes created by VR and AR and improvise the design and development | PSO1, PSO2, PSO3, PSO4 | K4 |
| CO5 | Evaluate the VR and AR applications developed to get highly immersive experiences. | PSO1, PSO2, PSO3, PSO4 | K5 |

| Unit | Content | Hours | COs | Bloom's |
|------|---|-------|------|------------|
| | | | | Taxonomy |
| | | | | Level |
| Ι | Representing the Virtual World | 8 | CO1, | K1, K2, |
| | Understanding the key elements of a Virtual Reality | | CO2, | K3, K4, K5 |
| | Experience - VR System - Interface to the virtual world | | CO3, | |
| | - Aural and haptic displays and their representation in | | CO4, | |
| | VR - Hardware: sensors, displays - Software: virtual | | CO5 | |
| | world generator, game engines | | | |
| | Geometry of Virtual Worlds and Physiology of | | | |
| | Human Vision | | | |
| | Changing position and orientation of objects - Axis- | | | |
| | angle representations of rotation - Viewing | | | |
| | transformations - Chaining the transformations - Human | | | |
| | eye movements and implications for VR. | | | |
| | Exercise 1: Set up Unity for VR development and | | | |
| | demonstrate the working of HTC Vive, Google | | | |
| | Cardboard, Google Daydream and Samsung gear VR. | | | |
| | Exercise 2: Develop a scene in Unity that includes. a | | | |
| | cube, plane and sphere. | | | |
| | Exercise 3: Apply transformations on the three game | | | |
| | objects and sweep the coverage of eye movements | | | |
| II | Visual Perception & Rendering | 9 | CO1, | K1, K2, |
| | Virtual Perception: Perception of Depth, Motion and | | CO2, | K3, K4, K5 |
| | Color - Visual Rendering: Ray tracing and shading, | | CO3, | |
| | Creating realistic and immersive experience with | | CO4, | |
| | lighting, shadows and textures. | | CO5 | |
| | Motion Tracking | | | |
| | Velocities and accelerations - Vestibular system - | | | |
| | Mismatched Motion and Vection Tracking - Tracking | | | |
| | 2D and 3D orientation, position and orientation of the | | | |
| | attached bodies. | | | |
| | <i>Exercise 4:</i> Create a new material and texture separately | | | |
| | for the three game objects. Change the colour, material | | | |
| | and texture of each game object separately in the scene. | | | |
| | Write a C# program in visual studio to change the colour | | | |
| | and material/texture of the game objects dynamically on | | | |
| | button click. | | | |
| | <i>Exercise 5:</i> Apply rigid body component, material and | | | |
| | Box collider to the game objects. Write a C# program to | | | |
| | grab and throw the sphere using VR controller. | | | |

| III | Interaction and Audio | 9 | CO1, | K1, K2, |
|-----|--|----|------|------------|
| | Interaction: Motor programs and remapping, | | CO2, | K3, K4, K5 |
| | Locomotion, Manipulation, Social Interaction - Audio: | | CO3. | , , |
| | Auditory Perception, Auditory Rendering. | | CO4, | |
| | <i>Exercise 5:</i> Add an audio source to the scene. | | CO5 | |
| | <i>Exercise 6:</i> Develop a simple UI(User interface) menu | | | |
| | with images, canvas, sprites and button. Write a C# | | | |
| | program to interact with UI menu through VR trigger | | | |
| | button such that on each successful trigger interaction | | | |
| | display a score on scene. | | | |
| | <i>Exercise</i> 7: Create an immersive environment (living | | | |
| | room/ battlefield/ tennis court) with only static game | | | |
| | objects. Create 3D game objects using Blender or any | | | |
| | available 3D models. Include animation and interaction | | | |
| | in the immersive environment. | | | |
| | <i>Case Study:</i> Create a VR application to visit a zoo with | | | |
| | at least 4 scenes, which can be changed dynamically, a | | | |
| | good UI, animation and interaction with game objects. | | | |
| IV | Augmented Reality Experience | 9 | CO1, | K1, K2, |
| | Ingredients - Augmented Reality Displays: Audio, | | CO2, | K3, K4, K5 |
| | Haptic, Visual and other sensory displays - Tracking | | CO3, | , , |
| | and Sensors: Stationary tracking systems, Mobile | | CO4, | |
| | sensors, Optical tracking sensor fusion. | | CO5 | |
| | Computer Vision for Augmented Reality | | | |
| | Marker-based approach: Markers, multiple cameras, | | | |
| | feature, visual, outdoor and hybrid tracking, Tracking | | | |
| | methods, Types of markers - Creating content using AR | | | |
| | Software. | | | |
| | Exercise 8: Create the planets and other celestial bodies | | | |
| | in a 3D environment for an AR solar system. | | | |
| | Exercise 9: Create a view of the solar system in their | | | |
| | surroundings and interact with the objects by zooming, | | | |
| | rotating, or tapping on them. | | | |
| V | AR Components | 10 | CO1, | K1, K2, |
| | Scene Generator - Monitoring system – Display - Game | | CO2, | K3, K4, K5 |
| | scene - AR Devices: Optical see-through HMD, Virtual | | CO3, | |
| | retinal systems, Monitor bases systems, Projection | | CO4, | |
| | displays, Video see-through systems | | CO5 | |
| | Case Study: Develop an AR book with a fusion of | | | |
| | traditional printed books and cutting-edge digital | | | |
| | enhancements. Make the paperback turn into a live and | | | |
| | moving story. With a simple scan of the book's pages | | | |
| | using your device's camera, unlock a world of | | | |
| | animations, videos, audio, and interactive elements on | | | |
| | your screen. | | | |

| CO# | Course Outcome(s) | PSO Addressed | Bloom's Taxonomy Levels (K1 to K6) | | | | | | | |
| CO1 | Remember the fundamentals of APIs | PSO1, PSO2, PSO3, PSO4 | K1 | | | | | | | |
| CO2 | Understand the concepts of REST APIs, API Design, integration and security | PSO1, PSO2, PSO3, PSO4 | K2 | | | | | | | |
| CO3 | Apply the concepts to design a fully functional API | PSO1, PSO2, PSO3, PSO4 | K3 | | | | | | | |
| CO4 | Analyze the API performance, error handling mechanisms, and best practices for API design | PSO1, PSO2, PSO3, PSO4 | K4 | | | | | | | |
| CO5 | Evaluate and integrate the existing and user defined APIs using appropriate tools and frameworks | PSO1, PSO2, PSO3, PSO4 | K5 | | | | | | | |
| CO6 | Develop a fully functional API including documentation and deployment | PSO1, PSO2, PSO3, PSO4 | K6 | | | | | | | |

| Unit | Content | Hours | COs | Bloom's Taxonomy |
|------|---------------------------------------|-------|-----------|---------------------|
| | | | | Level |
| Ι | Introduction to APIs and | 9 | CO1, CO2, | K1, K2, K3, |
| | Fundamentals of REST APIs | | CO3, CO4 | K4, K5, K6 |
| | Definition - API vs. Web Services - | | CO5, CO6 | |
| | API Request and Response Lifecycle- | | | |
| | Types of APIs: REST, SOAP, | | | |
| | GraphQL- Benefits and Use Cases of | | | |
| | APIs - Understanding REST | | | |
| | Architecture - REST API Principles - | | | |
| | JSON and XML Formats - RESTful | | | |
| | API | | | |
| II | API Design and Integration | 9 | CO1, CO2, | K1, K2, K3, |
| | Consuming External APIs - Handling | | CO3, CO4 | K4, K5, K6 |
| | API Responses and Errors - Principles | | CO5, CO6 | |
| | of Good API Design - Structuring | | | |
| | Endpoints and Resources - Using | | | |
| | Query Parameters and Path Variables | | | |
| III | API Development | 9 | CO1, CO2, | K1, K2, K3, |
| | Setting Up the Development | | CO3, CO4 | K4, K5, K6 |
| | Environment - API Endpoints and | | CO5, CO6 | |

| | Resource Naming - Creating First API Endpoint - API Development Tools - Postman, Curl - Setting up a REST API - Building a REST API - CRUD Operations with Database Integration - Implementing Middleware for Logging and Validation | | | |
|----|---|---|-----------------------------------|---------------------------|
| IV | API Security Overview of API Security- Rate limiting - DDoS mitigation – Throttling - Authentication and Authorization: Implementing API Keys, Username and Password, OAuth token, mTLS - JWT-Securing Endpoints – Securing Rest APIs | 9 | CO1, CO2, CO3, CO4 CO5, CO6 | K1, K2, K3, K4, K5, K6 |
| V | Testing,Deployment,andMaintenanceUnit Testing and Integration Testing- Tools for Testing - Mocking APIs for Testing - Deploying APIs - Logging and Monitoring - Importance of API Documentation-CreatingAPI API Documentation - Proper Error Handling and Status Codes - Pagination in APIs | 9 | CO1, CO2, CO3, CO4 CO5, CO6 | K1, K2, K3, K4, K5, K6 |

COURSE TITLE: NATURAL LANGUAGE PROCESSING

| Course Code | e | | | | | | | | | |
|---------------------------------|---|---|---|--|--|--|--|--|--|--|
| Credits | | 4 | | | | | | | | |
| Hours / Cycl | le | 3 | | | | | | | | |
| Category | | Part I | Elective | Theory | | | | | | |
| Semester | | III | | · | | | | | | |
| Year of Implementat | tion | From the Academic | From the Academic year 2025 - 2026 onwards | | | | | | | |
| Course Objectives | | To enable the students to understand the basics of language structure and how it is represented and processed by the computer To learn the concepts and how natural language text is generated by the computer. To have the knowledge of programming and skill to use software tools for NLP and NLG To understand the concepts and developments in large language models. To enable application of concepts learnt on NLP and NLG to real-life | | | | | | | | |
| On completi | ng the | course successfully | , the student will be | able to | | | | | | |
