

MATH-ALUMNI REUNIONS

The Mathematicians both old and young of Madras Christian College with great pride began to congregate from the year 2008 under the banner “Math – Reunion” to ventilate their feeling of oneness and belonging. The Mathematics Reunion-1 was held on 23rd Feb 2008 in which around 125 illustrious men and women, knowledgeable teachers and budding mathematicians participated. An exhibition of photos of past memories brought tears of joy to the viewers, when they reminisced their youthful years in college which was followed by a fruitful panel discussion with eminent alumni to share their views on the application of Mathematics in their various fields of work. On that occasion the oldest alumni present were honoured. Following the success of 2008, the second and editions of the same were held on 7th March 2009 and 10th April 2010 respectively. The forum provided a good interaction between the alumni and present students.

It was a great joy to see the alumni spread all over the country meeting together in the portals of their alma mater and sharing with each other their experiences as students in the Department of Mathematics. Some of the enthusiastic alumni have not only been participating in the Alumni Reunion but have also contributed much to the department through their valuable suggestions in the formation of the syllabus, financial contributions for the conduct of the Alumni meet, contributing scholarship for the poor and deserving students and the like.
