

MATHEMATICS ASSOCIATION

The Mathematics Association is a forum for the students to exhibit their academic talents and to develop their leadership skills. The office bearers of the association comprises of president, staff-advisor (from the staff), chairman, treasurer, and student representatives. After a formal inaugural of the association popular talks and lectures on emerging trends of mathematics by eminent speakers are conducted. Students are encouraged to participate in inter-collegiate competitive events and mathematics colloquiums. The association conducts an inter-collegiate event 'Mathwoods' and an inter-class event 'Sigma', providing ample opportunity for students to develop organizational and leadership skills. Educational tours are also organized once every academic year by the association.
